A New Race of Red Apples

The New Red Apples described in the following pages show the way to better apple profits for growers.

These new apples produce a much greater percentage of Extra Fancy fruit due to added color. **Extra Fancy is the profit maker.**

The Production Manager of the American Fruit Growers, Inc., speaking before the Washington State Horticultural Association, estimated that the additional red color resulting in increased Extra Fancy grade, produced by three of these new varieties would result in an increased per-acre profit to the grower approximately as follows:

RICHARED DELICIOUS—A per acre profit of \$630.00 instead of \$490.00—or a **net increased profit of 28% per acre to the grower.**

BLACKJON—That Blackjon—due to earlier color and better shipping and keeping quality, would show a \$210.00 per acre profit, as against \$70.00 per acre average loss on common Jonathan—actually a difference of \$280.00 per acre in favor of Blackjon.

Selected—Tested—Proved

In the development of Richared Delicious, nineteen (19) separate and distinct strains of "red" Delicious were secured and tested. They were all different. Some had no merit—something lacking in **SHAPE, COLOR, SIZE, KEEPING QUALITIES**, etc. Nothing has been found that equals **RICHARED**.

Likewise in the development of Blackjon, Miller's Ruby Rome—the most thorough tests were conducted over a period of time—and each variety reproduced through successive generations. Each and every one of these new varieties has been most carefully selected—most thoroughly tested—and conclusively proved as to merit.

A Word of Caution to Planters.

Quality merchandise is often imitated. Various so-called "red" strains are being offered for sale. The antecedents of many such "strains" are indefinite—their merits uncertain. Very few, if any, have been submitted to the rigid tests and long periods of actual performance that has placed these new red apples in front rank. Do not be satisfied with something represented "just as good as"—insist upon planting tested, proved varieties, sold under genuine trade-marked names.

These new varieties are being grown by the country's leading fruit growers. They are known and proved for quality and merit and have the endorsement of leading horticultural authorities everywhere.

Modern Nursery Packing Plant

Our new nursery packing house is one of the most modern in the country. It has insulated walls and roof; this enables us to hold nursery stock dormant and in good condition for planting until late in the season, when trees out-of-doors are in full leaf. Here trees and plants are graded and prepared for shipment under the proper conditions, with every safeguard against exposure or damage.

Information Regarding "Richared Delicious", "Blackjon" and "Miller's Ruby Rome Beauty"

RICHARED DELICIOUS is the one improved strain of Delicious that is a "known quantity" and that **HAS MADE GOOD**.

Previous to its introduction in the year 1926, Richared had been submitted to rigid tests. It was selected as the most outstanding red strain of Delicious from a total of nineteen separate, distinct types that were tested.

Richared Delicious is the most highly developed, best colored, best keeping strain of Delicious grown. Richared is preferred for commercial orchards by leading apple growers.

Growers who have Richared Delicious in bearing are enthusiastic about its outstanding, early, cherry-red color, and its superior keeping qualities.

RICHARED GROWERS SAY:

BOLLINGER ORCHARDS, Methow, Wash.—"In every way I am pleased with Richared. I feel safe in saying that I will get at least 25% more Extra Fancy Richared than of the old Delicious. I think the bright red of the Richared the most attractive of all red Delicious."

F. A. SCHELL.—"From my 400 trees top-worked five years ago to Richared Delicious I picked this season 2,400 loose boxes of Richared Delicious apples. These graded out between 98% and 99% Extra Fancy so far as color is concerned and out of the 2,400 boxes there were about 20 boxes that were smaller than size 113s."

Planters should be very cautious about planting a strain of Delicious sold merely as "Red Delicious." Numerous so-called "Red Delicious" are offered from various sources. Frequently such strains are of doubtful origin and have not been submitted to the rigid tests necessary to prove their worth.

RICHARED is a definitely proven strain of known merit. Planters purchasing genuine **RICHARED** trees bearing the trade-marked **RICHARED** label, may be assured of the finest, most highly developed, improved strain of Delicious obtainable.

BLACKJON is a new strain of Jonathan, identical in shape, size, productiveness, etc., with common Jonathan. But Blackjon colors earlier than common Jonathan—and colors approximately 98% Extra Fancy for color, as against approximately only 23% common Jonathan.

Because Blackjon colors earlier, it can be picked when in firm, prime condition, resulting in a better shipping apple and far better quality. Reaching the early markets it brings much better prices.

In an address before the Washington State Horticultural Association, the Production Manager of the American Fruit Growers, Inc., stated that returns over the last five-year period showed a return for the first pool of Jonathans of 40c per box more money than for later Jonathans, and further remarked:

"We are very careful to observe the color of Blackjon at the time of the closing of our first pool and were convinced that all of these apples could at that time have been marketed in the first pool."

WHAT OTHER AUTHORITIES SAY ABOUT BLACKJON:

F. E. DeSELLEM, Production Manager, Jim Hill Growers.—"There is no question in my mind that this improved Jonathan is going to surpass the ordinary Jonathan, both as to earliness and improved color."

W. A. LUCE, Orchard Adviser, Earl Fruit Co.—"I believe this apple to be a real asset to the fruit industry of the Northwest."

A. R. CHASE, County Agent.—"This new sport would appear to be as valuable in improving our Jonathan variety as the red strain of Delicious has been in improving the latter variety."

EARLY JONATHANS PAY—A prominent Wenatchee, Washington, grower says: "Last season my Delicious crop averaged \$1.92 per box, but my EARLY combination Jonathans brought me \$2.08 per box. Had my Jonathans been Blackjon I could undoubtedly have gotten that price or more for my entire crop."

For early districts where early apples are profitable, Blackjon is recommended as one of the best in its class.

* * * *

Miller's Ruby Rome

The strain of Rome Beauty being offered under the name of **Miller's Ruby Rome** is the same that heretofore has been called "**Black Rome Beauty**." A number of our patrons as well as Horticulturists have advised a change of name for various well founded reasons. This strain of Rome Beauty has proven to be the best in existence in competition with almost a score of Rome Beauty sports, in texture and color. The color of the **Miller's Ruby Rome** strain is a dark ruby red, solid in color, not showing the greenish undertone. Under any conditions this apple ripens to a darker color than the ordinary strain of Rome Beauty. It is this deep color all over that puts the most of the fruit in the Extra Fancy class. Quality is better than the parent Rome Beauty, being finer in texture. In all other respects the tree is typical of the old Rome Beauty, bearing early, consistently and heavy. All the advantages of the ordinary Rome with the addition of the color. Commercial orchardists are planting the **RUBY ROME** in preference to all other strains as it is in a class by itself with no competition.

USUAL DISTANCES
FOR PLANTING

Apple	25 to 35 feet apart
Pear	20 to 35 feet apart
Sweet Cherry	25 to 40 feet apart
Sour Cherry	} 16 to 24 feet apart
Plum	
Prune	
Apricot	
Peach	
Grapes	7 to 10 feet apart
Currant	4 to 6 feet apart
Gooseberry	4 to 6 feet apart
Raspberry	3 to 4 ft. by 5 to 7 ft.
Blackberry	3 to 4 ft. by 5 to 7 ft.

Number of Trees or Plants
Required per Acre—How
to Estimate.

Rule — Divide 43,560 (the number of square feet in an acre) by the number of square feet for each plant. The result is the number required for an acre.

If trees are planted on the Triangular system, 15 per cent more than for the Square system will be required.

Strawberry—Field culture, 1 to 1½ by
2½ to 3½ feet; garden culture, 1 to
2 feet.

We pay freight charges to customer's shipping point when cash accompanies order, and guarantee arrival in good condition.

WE MAKE NO GUARANTEE EVERGREENS WILL GROW

In order to handle Evergreens and Broadleaf Evergreens in the most satisfactory way, and to better insure their growth, these plants are dug with a ball of earth which is held in place by sewing around it a strip of burlap. In planting, dig a hole large and deep enough to take in the ball and place the plant in its normal position. Cut the top string and roll back the burlap but do not remove it entirely. Work fine dirt around the ball using plenty of water to wash the dirt into all the holes. Cover up to the top of the ground and water frequently. This is the best way to handle this class of plants. These plants have to be grown in the nursery row several years before they are large enough to sell. The extra time required to grow the plants and the work required to dig and prepare for shipment necessitates charging what may seem a high price.

EVERGREEN SHRUBS

	Each	Dozen
Pyracantha Lalandi, 24-30 in.....	\$2.00	\$20.00

ROSES—Oregon grown

Oregon grown roses are known East and West for their superior blooming quality and hardiness. Our roses are grown on rich, sandy loam, thus securing a particularly fine root system. We ship only one grade, strong 2 year No. 1 Oregon grown bushes. They will bloom the first season planted.

When planting, prune the stems back to about six inches. Trim the ends of the roots, leaving a new, clean cut. Plant in roomy hole, with bud or graft about two inches below level of ground. Water well and firm soil about the roots. Then hill the plants up completely, covering the tops with soil to prevent them from drying out. When the foliage starts gradually draw the soil away from the stems to a level with the ground.

Our selection of roses contains the best of the Standard Varieties and many of the New and Popular introductions of proven merits.

Key: Teas, T. Hybrid Teas, H.T. Hybrid Perpetual, H.P.

All the following 2 year No. 1 grade, 60 cents except where noted; dozen rates, 12 bushes for the price of 10.

American Beauty (H.P.)—Rich crimson, rose color.

Duchess of Wellington (H.T.)—Saffron, yellow, shading of crimson.

Edward Mawley (H.T.)—Velvety crimson, sweetly perfumed.

Etoile de France (H.T.)—Brilliant clear crimson.

Frau Karl Druschki (H.P.)—Giant, snow white blossoms.

General Jacqueminot (H.P.)—Velvety, maroon-scarlet.

General McArthur (H.T.)—A grand crimson, scarlet rose.

Golden Ophelia (H.T.)—Rich pure golden blossoms.

Gruss an Teplitz (H.P.)—Dazzling, fiery crimson, fragrant.

Hoosier Beauty (H.T.)—Glowing crimson, scarlet exc'pt'al.

Jonkeer J.L. Mock (H.T.)—Clear imperial pink. Gold medal

Kaiserin Augusta Victoria (H.T.)—Delicate creamy white.

Kitchener of Khartum (H.T.)—Brilliant scarlet; grand rose.

Lady Hillingdon (T.)—Deep apricot-yellow; long pointed buds.

Los Angeles (H.T.)—Flame-pink toned with coral; one of the finest.

Madame Abel Chatenay (H.T.)—Delicate salmon-pink; free bloomer.

Madame Caroline Testout (H.T.)—Bright satiny pink; one of best.

Maman Cochet (T.)—Rosy pink, one of the finest Teas.

Mrs. Arthur R. Waddell (H.T.)—Rosy scarlet; opens to coppery-salmon.

Ophelia (H.T.)—Brilliant salmon-flesh. None better.

PRESIDENT HERBERT HOOVER (H.T.)—Orange pink; shaded copper-red—each \$1.00.

Prince Camille de Rohan (H.T.)—Velvety crimson. The Black Rose.

Radiance (H.T.)—Rosy carmine with opaline tints.

Richmond (H.T.)—Scarlet crimson; long pointed buds.

Sunburst (H.T.)—Orange-copper shaded to flesh; very distinctive.

TALISMAN (H.T.)—Brilliant orange-red; a most remarkable rose—each 75 cents.

Ulrich Brunner (H.P.)—Carmine red. An old favorite.

White Maman Cochet (T.)—Pure white, shaded with blush.

Willowmere (H.T.)—Rich shrimp-pink; exceptional color.

Climbing and Pillar Roses

Cli. American Beauty—Rich red passing to crimson.
 Crimson Rambler—Vivid crimson beauties. A favorite.
 Dorothy Perkins—Shell pink; exceptional climber.
 Dr. W. Van Fleet—Beautiful shell pink; strong grower.
 Paul's Scarlet—Vivid scarlet; one of the grandest climbers.
 Red Dorothy Perkins—As popular as the pink Dorothy.
 Shower of Gold—Deep yellow. A very dainty blossom.
 White Dorothy Perkins—White sport of Dorothy Perkins.

Dwarf Polyantha or Baby Roses

Baby Rambler—Clear, brilliant, ruby red; hardy.
 Mlle. Cecile Brunner—Salmon-pink. A charming baby rose.
 Orleans—Deep cerise pink. One of the showiest baby roses.

Hybrid Rugosa or Shrub Rose

F. J. GROOTENDORST—A cross between Rosa Rugosa and Baby Rambler, retaining all the vigor, hardiness and healthy foliage of the Rugosa. Fine red blooms. Exceptional for hedging or mass planting—Each 75c

Hugonis, the Golden Rose of China

A fine dependable, hardy Yellow Shrub Rose. Very ornamental in foreground of shrubbery groups or corners of the rose garden. Very attractive—Price 75c each.

Special Rose Collection Offer

These twelve beautiful free blooming roses are some of the finest ever produced, including some of the latest introductions. It gives a complete assortment and variation of colors assuring entire satisfaction and pleasure. See colored illustrations in our general descriptive catalogue.
